Eco Step Women's Sneaker

The Eco Step (Vibram) women's sneaker, in the picture above, was made in China. Its content label lists Genuine Leather, upper: man-made materials, insole: smart wool.

A fabric test revealed that the actual content of the upper is a linen-cotton blend in one direction, and rayon in the other direction. The removable insole is a white and gray knit fabric, and the same fabric is sewn onto the back against the heel. The white threads are wool.

Found By: R' Aaron Drebin (Flatbush)
